Working Tools Seminar Series
Community-Facing Data Management Platforms for Indigenous-University Partnerships

Websseries

Fall 2020
Fridays
3:00-4:30pm (PST)

One of the key challenges to collaborative practice between university-based researchers and Indigenous communities is to foster equitable knowledge co-production with all stakeholders through the sharing of data. Increasingly this task is mediated by digital systems, but there is no single solution that serves all needs.

This seminar series brings together research partnership teams that have developed and employed digital knowledge mobilization solutions to their work. Our ambition is to explore existing efforts and anticipate future digital solutions for research partnerships.
